

# Green life –saving the earth

《Read Aloud》

A: Did you start anything for the environment ?

B: I have been started carrying my own shopping bag when I go to the grocery store. You know, so I don't have to use plastic bags.

A: Hmm, I have noticed people are doing that more and more, but I don't really do it. I'm too lazy I suppose.

## Let's talk about green life

Did you start anything for the environment ?

Could you tell me something people start for the environment ?

Are you doing it bad for the environment? What this ?

Do you think that the environmental protection and economic growth are in inverse proportion?
